Topic: Yellow WARDFLEX CSST Bonding

Ward Manufacturing LLC, the manufacturer of WARDFLEX Corrugated Stainless Steel Tubing, has been made aware that there may be some confusion in the Province of Ontario regarding the bonding requirements of CSST. This is related to OESC Bulletin 10-14-8 and whether yellow CSST is required to be bonded. What is stated in section 2 of this bulletin is: "The OESC does not include requirements for bonding Corrugated Stainless Steel Tubing (CSST). If bonding is necessary, the location of bonding connections and connection method should be according to the manufacturers directions and shall meet the requirement of the TSSA."

Ward Manufacturing requires that all installations of yellow-coated WARDFLEX CSST be bonded in accordance with section 4.10 of the WARDFLEX Design and Installation Guide. A copy of the Design and Installation Guide can be downloaded from our website, [www.wardmfg.com](http://www.wardmfg.com), or a hard copy can be requested wherever you purchase WARDFLEX products. If there are any questions about how to bond a WARDFLEX system, please contact the Ward Manufacturing engineering department at (570)638-2131 extension 178.

Thank you,  
Ward Manufacturing LLC
